It was a dull, routine little world. It didn't even have a city. Everything it had was in the garden.

By R. A. Lafferty

The protozoic recorder chirped like a bird. Not only would there be life traces on that little moon, but it would be a lively place. So they skipped several steps in the procedure.

The chordata discerner read Positive over most of the surface. There was spinal fluid on that orb, rivers of it. So again they omitted several tests and went to the cognition scanner. Would it show Thought on the body?

Naturally they did not get results at once, nor did they expect to; it required a fine adjustment. But they were disappointed that they found nothing for several hours as they hovered high over the rotation. Then it came—clearly and definitely, but from
quite a small location only.

"Limited," said Steiner, "as though within a pale. As though there were but one city, if that is its form. Shall we follow the rest of the surface to find another, or concentrate on this? It'll be twelve hours before it's back in our ken if we let it go now."

"Let's lock on this one and finish the scan. Then we can do the rest of the world to make sure we've missed nothing," said Stark.

There was one more test to run, one very tricky and difficult of analysis, that with the Extraordinary Perception Locator. This was designed simply to locate a source of superior thought. But this might be so varied or so unfamiliar that often both the machine and the designer of it were puzzled as to how to read the results.

The E. P. Locator had been designed by Glaser. But when the Locator had refused to read Positive when turned on the inventor himself, bad blood developed between machine and man. Glaser knew that he had extraordinary perception. He was a much honored man in his field. He told the machine so heatedly; the machine replied, with such warmth that its relays chattered, that Glaser did not have extraordinary perception; he had only ordinary perception to an extraordinary degree. There is a difference, the machine insisted. It was for this reason that Glaser used that model no more, but built others more amenable. And it was for this reason also that the owners of Little Probe had acquired the original machine so cheaply.

And there was no denying that the Extraordinary Perception Locator (or Eppel) was a contrary machine. On Earth it had read Positive on a number of crack-pots, including Waxey Sax, a jazz tootler who could not even read music. But it had also read Positive on ninety per cent of the acknowledged superior minds of the Earth. In space it had been a sound guide to the unusual intelligences encountered. Yet on Suzuki-Mi it had read Positive on a two-inch-long worm, only one of them out of billions. For the countless identical worms no trace of anything at all was shown by the test.

So it was with mixed expectations that Steiner locked onto the area and got a flick. He then narrowed to a smaller area (apparently one individual, though this could not be certain) and got very definite action. Eppel was busy. The machine had a touch of the ham in it, and assumed an air of importance when it ran these tests.

Finally it signaled the result, the most exasperating result it ever produces: the sin-
gle orange light. It was the equivalent of the shrug of the shoulders in a man. They called it the "You tell me light."

So among the intelligences there was at least one that might be extraordinary, though possibly in a crackpot way. It is good to be forewarned.

"SCAN the remainder of the world, Steiner," said Stark, "and the rest of us will get some sleep. If you find no other spot then we will go down on that one the next time it is in position under us, in about twelve hours."

"You don't want to visit any of the other areas first? Somewhere away from the thoughtful creature?"

"No. The rest of the world may be dangerous. There must be a reason that thought is in one spot only. If we find no others then we will go down boldly and visit this."

So they all, except Steiner, went off to their bunks then: Stark, the Captain; Gregory Gilbert, the executive officer; Wolfgang Langweilig, the engineer; Casper Craig, supercargo, tycoon and 51% owner of the Little Probe, and F. R. Briton, S.J., a Jesuit priest who was linguist and checker champion of the craft.

Dawn did not come to the moon-town. The Little Probe hovered stationary in the light and the moon-town came up under the dawn. Then the Probe went down to visit whatever was there.

"There's no town," said Steiner. "Not a building. Yet we're on the track of the minds. There's nothing but a meadow and some boscage, a sort of fountain or pool, and four streams coming out of it."

"Keep on towards the minds," said Stark. "They're our target."

"Not a building, not two sticks or stones placed together. That looks like an Earth-type sheep there. And that looks like an Earth-lion, I'm almost afraid to say. And those two... why, they could well be Earth-people. But with a difference. Where is that bright light coming from?"

"I don't know, but they're right in the middle of it. Land here. We'll go to meet them at once. Timidity has never been an efficacious tool with us."

Well, they were people. And one could only wish that all people were like them. There was a man and a woman, and they were clothed either in very bright garments or in no garments at all, but only in a very bright light.

"Talk to them, Father Briton," said Stark. "You are the linguist."

"Howdy," said the priest.

He may or may not have been understood, but the two of them smiled at him, so he went on.
"Father Briton from Philadelphia," he said, "on detached service. And you, my good man, what is your handle, your monicker, your tag?"

"Ha-Adamah," said the man.

"And your daughter, or niece?"

It may be that the shining man frowned momentarily at this; but the woman smiled, proving that she was human.

"The woman is named Hawwah," said the man. "The sheep is named sheep; the lion is named lion, the horse is named horse and the hoolock is named hoolock."

"I understand. It is possible that this could go on and on. How is it that you use the English tongue?"

"I have only one tongue; but it is given to us to be understood by all; by the eagle, by the squirrel, by the ass, by the English."

"We happen to be bloody Yankees, but we use a borrowed tongue. You wouldn't have a drink on you for a tubful of thirsty travellers, would you?"

"The fountain."

"Ah—I see."

But the crew all drank of the fountain to be sociable. It was water, but water that excelled, cool and with all its original bubbles like the first water ever made.

"What do you make of them?" asked Stark.

"Human," said Steiner. "It may even be that they are a little more than human. I don't understand that light that surrounds them. And they seem to be clothed, as it were, in dignity."

"And very little else," said Father Briton, "though that light trick does serve a purpose. But I'm not sure they'd pass in Philadelphia."

"Talk to them again," said Stark. "You're the linguist."

"That isn't necessary here, Captain. Talk to them yourself."

"Are there any other people here?" Stark asked the man.

"The two of us. Man and woman."

"But are there any others?"

"How would there be any others? What other kind of people could there be than man and woman?"

"But is there more then one man or woman?"

"How could there be more than one of anything?"

The captain was a little puzzled by this, but he went on doggedly: "Ha-Adamah, what do you think that we are? Are we not people?"

"You are not anything till I name you. But I will name you and then you can be. You are named Captain. He is named Priest. He is named Engineer. He is named Flunky."

"Thanks a lot," said Steiner.
"But are we not people?" persisted Captain Stark.

"No. We are the people. There are no people but two. How could there be other people?"

"And the damnest thing about it," muttered Langweilig, "is, how are you going to prove him wrong? But it does give you a small feeling."

"Can we have something to eat?" asked the Captain.

"Pick from the trees," said Ha-Adamah, "and then it may be that you will want to sleep on the grass. Being not of human nature (which does not need sleep or rest), it may be that you require respite. But you are free to enjoy the garden and its fruits."

"We will," said Captain Stark.

They wandered about the place, but they were uneasy. There were the animals. The lion and lioness were enough to make one cautious, though they offered no harm. The two bears had a puzzling look, as though they wanted either to frolic with you or to mangle you.

"If there are only two people here," said Casper Craig, "then it may be that the rest of the world is not dangerous at all. It looked fertile wherever we scanned it, though not so fertile as this central bit. And those rocks would bear examining."

"Flecked with gold, and possibly with something else," said Stark. "A very promising site."

"And everything grows here," added Steiner. "Those are Earth-fruits and I never saw finer. I've tasted the grapes and plums and pears. The figs and dates are superb, the quince is as flavorsome as a quince can be, the cherries are excellent. And I never did taste such oranges. But I haven't yet tried the—" and he stopped.

"If you're thinking what I'm afraid to think," said Gilbert, "then it will be the test at least: whether we're having a pleasant dream or whether this is reality. Go ahead and eat one."

"I won't be the first to eat one. You eat."

"Ask him first. You ask him."

"Ha-Adamah, is it allowed to eat the apples?"

"Certainly. Eat. It is the finest fruit in the garden."

"Well, the analogy breaks down there," said Stark. "I was almost beginning to believe in the thing. But if it isn't that, then what. Father Briton, you are the linguist, but in Hebrew does not Ha-Adamah and Hawwah mean—?"

"Of course they do. You know that as well as I."

"I was never a believer. But would it be possible for the exact same proposition to maintain here as on Earth?"
“All things are possible.”
And it was then that Ha-Adamah, the shining man, gave a wild cry: “No, no. Do not approach it. It is not allowed to eat of that one!”

It was the pomegranate tree, and he was warning Langweilig away from it.

“Once more, Father,” said Stark, “you should be the authority; but does not the idea that it was the apple that was forbidden go back only to a medieval painting?”

“It does. The name of the fruit is not mentioned in Genesis. In Hebrew exegesis, however, the pomegranate is usually indicated.”

“I thought so. Question the man further, Father. This is too incredible.”

“It is a little odd. Adam, old man, how long have you been here?”

“Forever less six days is the answer that has been given to me. I never did understand the answer, however.”

“And have you gotten no older in all that time?”

“I do not understand what ‘older’ is. I am as I have been from the beginning.”

“And do you think that you will ever die?”

“To die I do not understand. I am taught that it is a property of fallen nature to die, and that does not pertain to me or mine.”

“And are you completely happy here?”

“Perfectly happy according to my preternatural state. But I am taught that it might be possible to lose that happiness, and then to seek it vainly through all the ages. I am taught that sickness and aging and even death could come if this happiness were ever lost. I am taught that on at least one other unfortunate world it has actually been lost.”

“Do you consider yourself a knowledgeable man?”

“Yes, since I am the only man, and knowledge is natural to man. But I am further blessed. I have a preternatural intellect.”

Then Stark cut in once more: “There must be some one question you could ask him, Father. Some way to settle it. I am becoming nearly convinced.”

“Yes, there is a question that will settle it. Adam, old man, how about a game of checkers?”

“This is hardly the time for clowning,” said Stark.

“I’m not clowning, Captain. How about it, Adam? I’ll give you choice of colors and first move.”

“No. It would be no contest. I have a preternatural intellect.”

“Well, I beat a barber who was champion of German-town. And I beat the champion of Morgan County, Tennessee, which is the hottest checker center on Earth. I’ve played against, and beaten,
machines. But I never played a preternatural mind. Let's just set up the board, Adam, and have a go at it."

"No. It would be no contest. I would not like to humble you."

They were there for three days. They were delighted with the place. It was a world with everything, and it seemed to have only two inhabitants. They went everywhere except into the big cave.

"What is there, Adam?" asked Capain Stark.

"The great serpent lives there. I would not disturb him. He has long been cranky because plans he had for us did not materialize. But we are taught that should ever evil come to us, which it cannot if we persevere, it will come by him."

They learned no more of the real nature of the sphere in their time there. Yet all but one of them were convinced of the reality when they left. And they talked of it as they took off.

"A crowd would laugh if told of it," said Stark, "but not many would laugh if they had actually seen the place, or them. I am not a gullible man, but I am convinced of this: that this is a pristine and pure world, and that ours and all the others we have visited are fallen worlds. Here are the prototypes of our first parents before their fall. They are garbed in light and innocence, and they have the happiness that we have been seeking for centuries. It would be a crime if anyone disturbed that happiness."

"I too am convinced," said Steiner. "It is Paradise itself, where the lion lies down with the lamb, and where the serpent has not prevailed. It would be the darkest of crimes if we or others should play the part of the serpent, and intrude and spoil."

"I am probably the most skeptical man in the world," said Casper Craig the tycoon, "but I do believe my eyes. I have been there and seen it. It is indeed an unspoiled Paradise; and it would be a crime calling to the wide heavens for vengeance for anyone to smirch in any way that perfection."

Down in the great cave that Old Serpent, a two-legged one among whose
names were "Snake-Oil Sam," spoke to his underlings:

"It'll take them fourteen
days to get back with the set-
tlers. We'll have time to over-
haul the blasters. We haven't
had any well-equipped settlers
for six weeks. It used to be
we'd hardly have time to strip
and slaughter and stow be-
fore there was another batch
to take care of."

"I think you'd better write
me some new lines," said
Adam. "I feel like a goof say-
ing those same ones to each
bunch."

"You are a goof, and there-
fore perfect for the part. I
was in show business long
enough to know never to
change a line too soon. I did
change Adam and Eve to Ha-
Adamah and Hawwah, and
the apple to the pomegranate.
People aren't becoming any
smarter—but they are becom-
ing better researched, and
they insist on authenticity.

"This is still a perfect come-
on here. There is something in
human nature that cannot re-
sist the idea of a Perfect Par-
adise. Folks will whoop and
holler to their neighbors to
come in droves to spoil and
mar it. It isn't greed or the
desire for new land so much—
though that is strong too.
Mainly it is the feverish pas-
sion to befoul and poison what
is unspoiled. Fortunately I am
sagacious enough to take ad-
vantage of this trait. And
when you start to farm a new

world on a shoestring you
have to acquire your equip-
ment as you can."

He looked proudly around
at the great cave with its
mountains and tiers of mate-
rials, heavy machinery of all
sorts, titanic crates of food-
stuff space-sealed; wheeled,
tracked, propped, vaned and
jetted vehicles; and power
packs to run a world.

He looked at the three dozen
space ships stripped and
stacked, and at the rather
large pile of bone-meal in one
corner.

"We will have to have an-
other lion," said Eve. "Bows-
er is getting old, and Marie-
Yvette abuses him and gnaws
his toes. And we do have to
have a big-maned lion to lie
down with the lamb."

"I know it, Eve. The lion is
a very important prop. May-
be one of the crackpot settlers
will bring a new lion."

"And can't you mix another
kind of shining paint? This
itches. It's hell."

"I'm working on it."

CASPER CRAIG was still
dictating the gram:

"Amazing quality of lon-
gevity seemingly inherent in
the locale. Climate ideal. Day-
light or half-light. All twenty-
one hours from Planet Del-
phina and from Sol. Pure wa-
ter for all industrial purposes.
Scenic and storied. Zoning and
pre-settlement restrictions to
insure congenial neighbors. A

IN THE GARDEN 109
completely planned globular settlement in a near arm of our own galaxy. Low taxes and liberal credit. Financing our specialty—"

"And you had better have an armed escort when you return," said Father Briton.

"Why in cosmos would we want an armed escort?"

"It's as phony as a seven-credit note!"

"You, a man of the cloth doubt it? And us ready skeptics convinced by our senses? Why do you doubt?"

"It is only the unbelieving who believe so easily in obvious frauds. Theologically unsound, dramaturgically weak, philologically impossible, zoologically rigged, salted conspicuously with gold and shot through with anachronisms. And moreover he was afraid to play me at checkers."

"What?"

"If I have a preternatural intellect I wouldn't be afraid of a game of checkers with anyone. Yet there was an unusual mind there somewhere; it was just that he chose not to make our acquaintance personally."

"They looked at the priest thoughtfully.

"But it was Paradise in one way," said Steiner at last.

"How?"

"All the time we were there the woman did not speak."
PAY NOW AND...

- Range the stars!
- Explore the past, present and future!
- See worlds that might have been!
- Be in on ideas that are just aborning!

All this adventuring comes with each issue of IF Science Fiction Magazine—and a subscription saves you money, beats the newsstands by a week to ten days, arrives flat and neat—there are too many reasons for subscribing to list on this page, but there are some, and another is that you’re sure to get your copies. Neither snow nor rain—you know? Cut out the coupon or send your order in on any scrap of paper about, along with check, money order or cash. We don’t need the coupon; it’s there just in case you want to use it. But whatever you do, don’t use up the future—subscribe today!
